ECOMONDO CHINA - CDEPE

One of the largest green technology trade show in Western China market. The show is co-organized by Sichuan Environmental Protection Industry Association (SCEPI) and Europe China Environmental Exhibitions (ECEE) – an Italian Exhibition Group's Chengdu based company.

WHY CHENGDU

China's south-western regions

and in particular the **Chengdu-Chongqing economic circle**, contribute around 30% of the western China's total GDP and are set to play a key role in pursuing the road map towards the complete decarbonisation of Chinese production by 2030.

Chengdu

will play a key role in the **One Belt One Road project** and **Yangtze River Economic Belt** established by China's central government and is expected to become the international logistics centre of Southwest China.

By investing in Chengdu

investors gain access to Chinese trade channels in an area that has a **strong demand** for international knowledge and technology, avoiding the more crowded and competitive markets such as Shanghai, Beijing, Shenzhen or Guangzhou.

WHY PARTICIPATE

> Direct access to the **fast-growing** green technology market of Western China

> One-on-one **matchmaking** opportunities with Chinese buyers and government institutions

> Rich contents and **learning** opportunities, thanks to technical forums and international workshops that take place within the show and focus on **B2B** and **B2G** business opportunities

> A strong local institutional support and participation of **government** bodies and industry **associations**

2023 FACTS & FIGURES

7 COUNTRIES AND REGIONS

25,000 SQM EXHIBITION AREA

396 EXHIBITORS  +27%

28,356 VISITS  +52%

10 CONFERENCES

THE ENTIRE SECTOR PLATFORM

Water pollution control

Solid waste & biowaste treatment and recycling

Environmental Monitoring

Waste to energy & renewable energy

Air pollution prevention and control

Soil & Groundwater Remediation

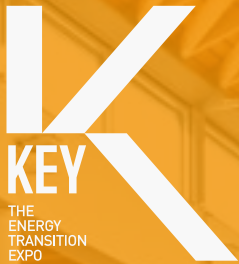

Environmental Service

New energy & storage & electric mobility

Starting from the 2024 edition, ECOMONDO CHINA – CDEPE will also feature a new energy area, dedicated to innovative battery technologies and energy storage systems, electric and sustainable mobility.

The new energy area is realized in partnership with KEY - The Energy Transition Expo. Organized by Italian Exhibition Group, KEY is Europe's leading show dedicated to technologies, services, integrated solutions for energy efficiency and renewable energy in Italy and in the Mediterranean basin.

2023 VISITORS

VISITOR'S MAIN BUSINESS

- 32%** Engineering / Operation / Supervision
- 19%** Municipal Related Institutions
- 12%** Industrial / Manufacturing
- 12%** Dealer / Agent
- 7%** Equipment and material suppliers
- 5%** Design and Research Institute
- 3%** Government Department / Industry Association
- 10%** Other

SEGMENTS OF INTEREST

- 64%** Water treatment
- 28%** Air pollution prevention & control
- 27%** Comprehensive Environmental Management
- 20%** Solid waste & bio waste treatment
- 20%** Environmental Services

THE INDUSTRY'S TRENDING TOPICS

ECOMONDO CHINA - CDEPE offers a series of programme of conferences to present information and industry's trending topics in Southwest China.

Sub-forums and Seminars

- Municipal sewage treatment
- Village and town sewage treatment
- Industrial wastewater treatment
- VOCs and air pollution control
- Environmental monitoring technology
- Soil remediation
- Waste management
- Waste-to-energy
- Energy efficiency
- Clean energy
